Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 10-14 and 29-31, drawn to a process for producing a dimensionally stable pack, classified in class 493, subclass 151.
- II. Claims 36-39, drawn to a process for folding and sealing an outer wrapper, classified in class 493, subclass 156.
- III. Claims 45-51, drawn to a process for producing a pack made of thin cardboard made of shrinkable material, classified in class 493, subclass 157.

The inventions are distinct, each from the other because of the following reasons:

Inventions Groups (I and II) and Group III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require to have the step of conveying the packs with the finished and sealed outer wrapper through a shrinking station. The subcombination has separate utility such as the step of conveying the packs with the finished and sealed outer wrapper through a shrinking station.

Inventions of Group II and Group I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the

instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require to have the step of transporting the packs with the temporarily maintained tabs to a side tab permanent sealing assembly comprises moving the packs upward to a pack tower nor the step of fixedly maintaining the side tabs in the side tab permanent sealing assembly by full surface sealing in the pack tower. The subcombination has separate utility such as the step of transporting the packs with the temporarily maintained tabs to a side tab permanent sealing assembly comprises moving the packs upward to a pack tower and the step of fixedly maintaining the side tabs in the side tab permanent sealing assembly by full surface sealing in the pack tower.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sameh H. Tawfik whose telephone number is (703) 308-2809. The examiner can normally be reached on Monday - Friday from 8:00 AM to 4:00 PM.
